12-point rpolygon decomposition: original, current (bug), validated re-cut
Original (area = 20)
12 stored even-index points; x-first reconstruction
Current rpolygon_cut_convex
piece 0 is non-convex
Validated re-cut
3 convex pieces; areas 10 + 9 + 1 = 20
area 1
non-convex
area 1
area 9
area 10
original (area = 20)
piece 0: non-convex
3 convex pieces
